Governor's Council on Workforce Policy

October 1, 2008

The Honorable Elaine L. Chao
Secretary of Labor
U.S. Department of Labor
200 Constitution Avenue, NW
Washington, DC 20210

Dear Secretary Chao:

On behalf of the Governor's Council on Workforce Policy (GCWP) I am pleased to present Arizona's Workforce Investment Act (WIA) Report for Program Year (PY) 2007. This report highlights our achievements over the past year, which has been another highly successful one for workforce programs in Arizona.

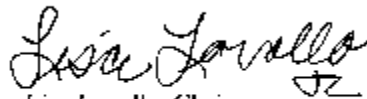

Arizona has successfully integrated employment, education, training and support services in its continuing goal to provide employers with a demand-driven, skilled workforce and Arizonans with good paying jobs and opportunities for career choice. The results of these efforts are evident in our Program Year 2007 performance outcomes, as we anticipate meeting or exceeding all negotiated WIA performance levels.

During PY 2007, Arizona was one of eight states to be awarded incentive funds for exceeding all performance measures. The new incentive funds will be utilized to expand our existing "Enhancing Arizona's Workforce Connection" healthcare initiative to include other local high demand industries.

Arizona is also proud to have been awarded a Workforce Innovation in Regional Economic Development (WIRED) grant. The GCWP, along with public and private partnerships, will continue to strive to advance the principles found in programs like WIRED to improve the service delivery system ensuring that our state has a vibrant and viable workforce.

This is an excellent opportunity to appreciate all of the training and employment efforts within a multitude of state and local level partnerships that work together to ensure that Arizona's workforce system is competitive in today's global economy.

Sincerely,

Lisa Lovullo, Chair
Governor's Council on Workforce Policy

Arizona Workforce Connection

Arizona's Workforce Connection (AWC) is a statewide system committed to coordinating a comprehensive approach to workforce development, which incorporates the state's economic development goals and strategies using federal, state, and local resources. The AWC consists of the Governor's Council on Workforce Policy (GCWP), 14 Local Workforce Investment Areas (LWIAs) along with their respective Local Workforce Investment Boards (LWIBs), 22 comprehensive One-Stop centers, 39 satellite offices, and an array of workforce partners. Satellite offices throughout the state have increased by 20 over the past year increasing the ability for the AWC to work toward its goal of implementing a strong, market-driven, service delivery system. The AWC is ready to respond in Program Year (PY) 2008 to the skill needs of businesses and workers throughout the state and within the local communities.

This annual report focuses on PY 2007, which covers the period of time from July 1, 2007 through June 30, 2008. This is the eighth year of Workforce Investment Act (WIA) implementation in Arizona. The report describes how WIA Title I-B services are provided in Arizona, highlights local and state accomplishments, and concludes with performance results.

The State of Arizona has a workforce development portal page for business, job seeking customers and employment counselors. Customers are directed to the website www.arizonaworkforceconnection.com/. This portal has links to the Arizona Virtual OneStop (VOS) system, Arizona's Workforce Development and Labor Exchange internet based system. Since VOS is a web-based application, it can be accessed from anywhere there is an internet connection. VOS provides access to job seekers and business customers wherever and whenever access is needed providing a comprehensive statewide management information system for WIA Title I-B and Wagner-Peyser programs. The system tracks service delivery of WIA participants and allows job seekers the ability to job search, explore career/training opportunities and receive information on labor market information, as well as community services. In order to meet the needs of the business community, employers have the ability to utilize VOS for recruiting, posting job orders, and accessing labor market information.

AWC's goal is to support the economic success of individuals, businesses and communities by improving opportunities for growth. Arizona's performance substantiates the state's continuous improvement efforts by successfully receiving an incentive award from the federal government for exceeding its negotiated performance standards under WIA for the third consecutive year.

Arizona is prepared to meet the workforce challenges by preparing to build a comprehensive, seamless system of educational, training, and employment services throughout the state. AWC has created an innovative workforce system that is responsive, cohesive, and accountable, which allows local areas to meet business and job seekers needs efficiently.

Arizona's Economic Environment

Arizona has been one of the fastest growing states in the nation in recent years in terms of employment (consistently rated among the top ten), yet recently, its stand in state rankings has been declining and was at #46 at the close of PY 2007. Employment growth has declined for the last two program years. Nonfarm payroll employment grew by just 0.1 percent in PY 2007 compared to 3.1 percent in PY 2006 and 5.7 percent in PY 2005 (see Table 1).

By the end of PY 2007 (June 2008), nonfarm payroll employment in Arizona had experienced over-the-month employment losses in four of the first six months of calendar year (CY) 2008. By June of 2008, the over-the-year growth rate was down to - 1.5 percent. Much of the recent decline in Arizona's employment has to do with Arizona's unique economic structure. The housing boom was an integral part of the economic structure and has contributed to a negative affect in terms of the past and continuing downturn in the construction and related financial activities sectors. The end of the boom has also broadly spread throughout other areas of the economy including trade, transportation and utilities, manufacturing and employment services.

The state continues to show moderate strength in industries such as education and health services, leisure and hospitality, and natural resources and mining. Employment growth in education and health services should continue to increase as the demand for education and health services continues to grow. Current demographics in Arizona and the nation are being influenced by the aging of the "baby boomers". The U.S. Census Bureau population projections forecast (Population Division, Interim State Population Projections, 2005) that the median age of Arizona residents is expected to rise from 34.2 as measured by the 2000 census to 38.2 years of age by 2020. Additionally, this aging of the population should also result in employment opportunities for leisure and hospitality. A key component of the Arizona economy has long been the leisure and hospitality industry. The state's diversified and distinctive climate and renowned national parks and recreation sites are appealing to full-time and seasonal residents, as well as national and international tourists. Natural resources and mining have been adding jobs to meet a strong demand for metal ores, especially copper, in international markets.

Table 1: Percentage Change in Program Year Average Employment – Arizona

Source: AZ Dept of Commerce, Research Administration, BLS Current Employment Statistics

Industry	PY 2005	PY 2006	PY 2007
Total Nonfarm	5.7%	3.1%	0.1%
Manufacturing	3.3%	-0.9%	-2.0%
Natural resources and mining	0.9%	20.0%	15.1%
Construction	14.4%	0.5%	-10.1%
Trade, transportation and utilities	5.5%	4.1%	0.6%
Leisure and Hospitality	5.7%	3.6%	1.2%
Education and Health Services	5.7%	5.2%	3.7%
Professional and Business Services	7.9%	5.6%	-0.2%
Financial Activities	6.5%	3.2%	-2.8%
Other	6.5%	1.5%	-0.6%
Government	0.9%	2.0%	4.3%
Information	-0.4%	-4.9%	-1.3%

Total nonfarm employment increased by just over 2,000 over the program year. Overall, five of the major industries had annual average increases; educational and health services (11,100), government (17,775), leisure and hospitality (3,283), trade, transportation and utilities (3,167) and mining (1,592). Annual average losses occurred in construction (-23,942), financial activities (-5,250), information (-550), manufacturing (-3,725), professional and business services (-1,292) and other services (-608).

For the forecast period of 2008 to 2009, the Arizona Department of Commerce (ADOC) projected slightly negative state employment growth (-0.5 percent) in 2008 and slightly positive growth for 2009 (0.1 percent) by the last half of 2009. The weakening Arizona economy is expected to slow population growth for CY 2008. “Gradual economic improvements are forecast in 2009, taking into account lower interest rates, greater availability of credit, economic stimulus programs and a leveling of petroleum prices.” A gradual acceleration in the housing sector is expected during this same time period.

Table 2: Forecasted Total Nonfarm Employment, Growth Rate

Source: AZ Department of Commerce, Research Administration

	CY 2007	CY 2008	CY 2009
Arizona	1.2%	-0.5%	0.1%
Phoenix-Mesa-Scottsdale Metro	1.3%	-0.5%	0.1%
Tucson Metro	0.9%	-1.5%	-0.3%
Balance of State	1.0%	0.7%	0.5%

Arizona’s seasonally adjusted unemployment rate was 4.8 percent at the end of PY 2007, compared to a 3.6 percent rate at the end of PY 2006 (see Table 3). Nationally, the seasonally adjusted unemployment rate was unchanged at 5.5 percent as of June 2008. Initial unemployment insurance claims have been on the rise and expectations are that the unemployment rate will continue its upward trend into the next program year, but it remains unclear as to what degree.

Table 3: Unemployment Rate (Seasonally adjusted) – End of Program year(s)

Source: U.S. Bureau of Labor Statistics

	June 2006	June 2007	June 2008
United States	4.6%	4.6%	5.5%
Arizona	4.1%	3.6%	4.8%
Phoenix-Mesa-Scottsdale Metro	3.7%	3.1%	4.3%
Tucson Metro	4.1%	3.4%	4.7%
Flagstaff Metro	4.4%	3.5%	4.5%
Lake Havasu City-Kingman-Metro	4.3%	4.3%	6.4%
Prescott Metro	4.0%	3.5%	4.6%
Yuma-Metro	13.9%	13.6%	15.1%

Personal income growth in Arizona in CY 2007 was slightly above the national average. The metropolitan areas in Arizona also enjoyed growth close to the national average for CY 2007. As the Arizona economy has weakened so has personal income growth. In first quarter of CY 2008, personal income growth had decreased to 3.8 percent over-the-year and the national rate of growth for the same period was down to 4.8 percent.

State Highlights

Business Services

This year the Governor's Council on Workforce Policy (GCWP) concentrated its discretionary funds on business outreach. Local areas submitted proposals to conduct outreach activities to businesses in their respective areas. Outreach projects included providing training funds for small businesses that do not qualify for other types of state incentives, marketing the Arizona Job Training Program, increasing new business participation with local One-Stop centers and raising awareness of the WIA and partnering agency services.

Innovation Frontier Arizona

Innovation Frontier Arizona (IFA) is a newly created Arizona Workforce Innovation in Regional Economic Development (WIRED) initiative to align education, workforce development, economic development, industry, local workforce systems, and various educational programs (K-12 and higher education levels) along the region of the southern Arizona border. The region includes Cochise, Pima, Santa Cruz and Yuma counties, which share a constellation of key military installations, one of the nation's premier aerospace defense clusters, and 370 miles of the nation's border with Mexico. IFA's goal is to bridge a workforce skills gap through career-ladder training that will help workers learn skills needed for better-paying technology-and knowledge-driven jobs, and eventually increase the average salary of local wage earners.

In November 2007, IFA held a kickoff event in Tucson to launch the WIRED initiative in Southern Arizona. A total of 127 business representatives, government officials, educators, and other stakeholders from the four southern Arizona counties participated in the event. A variety of partners demonstrated commitment to IFA by taking a strong role in the kickoff. This gave business leaders an opportunity to learn about the WIRED Initiative and the public workforce system as it relates to the role of the private sector.

Partners Assuring Youth Success

The Governor's Office, in collaboration with the ADOC, Arizona Department of Economic Security (ADES) and other community based stakeholders, continues to direct the efforts of the Arizona Vision for Youth Task Force in Arizona's growing counties of central Arizona, specifically Pinal and Gila counties. Partners Assuring Youth Success (PAYS) focuses on workforce development for youth transitioning out of the child welfare system with special emphasis on youth who are also involved in the juvenile justice system. PAYS goal is to improve working relationships in the areas of both policy and practice, develop and promote implementation of recommendations for workforce readiness for youth, particularly those at risk due to inclusion in the following categories: youth who are in foster care, have dropped out of school, and have incarcerated parents, juvenile offenders, migrants, and who have disabilities. PAYS works with local businesses to develop employment opportunities, as well as training and support to youth liaisons or advocates, who work in partnership to develop outreach, service and employment components of the program.

Accomplishments this year include the majority of participating youth have been enrolled in education programs, obtained employment, developed positive working relationships with the former foster care youth, and non-existing resources have been developed for obtaining birth certificates, housing and behavioral health services.

Strategic Plans and Board Recertification

The GCWP in cooperation with the ADES reviewed and approved the local strategic plans for PY 2008 and 2009. Recertification of the LWIBs completed the process in Arizona's commitment to serving local communities. With local strategic plans updated and LWIBs recertified the AWC moves into PY 2008 ready to serve the business and job seeker by strategically focusing on either training in high demand, high growth industries through individual training accounts, on-the-job training or customized training to eligible individuals or services specific to businesses for their workforce needs.

WIA Title V Incentive Funds

Arizona is proud to have received the Title V Incentive Grant Award for the third year in a row. Arizona was one of eight states to receive these incentive funds. The funding will be used to continue efforts in the allied healthcare field and expand efforts to engage local area industry clusters to build on employer needs. The partnerships developed between the AWC, Arizona Department of Education's Adult Education Services, and Career and Technical Education have made this project now referred to as "Expanding Arizona's Workforce Connection" a very successful endeavor to provide quality services to Arizona businesses and communities.

Cost Effectiveness

Program	PY 2007 Participants	Cost per Participant
*Overall for all programs	13,052	\$2,938.85
Adult Program	6,906	\$1,889.96
Dislocated Worker Program	2,937	\$3,030.04
Youth Program	3,209	\$3,538.36

**Overall includes Administration Expenses*

Arizona received a WIA Title I-B allotment of \$38,357,880 that provided services and activities through the AWC One-Stop system for PY 2007 (July 1, 2007 through June 30, 2008). A total of 13,052 participants were served through formula funding provided to the 14 LWIAs through the adult (\$13,052,069), dislocated worker (\$7,918,475), and youth (\$11,354,607) funding streams. LWIAs also provided services to Arizona's business communities and affected workers through rapid response funded (\$980,751) activities by providing assistance with lay-offs and closures.

Arizona's cost per participant for PY 2007 ranged from \$1,890 for adults, \$3,538 for youth, to \$3,030 for dislocated workers. Adult participants generally are looking for immediate employment at the One-Stop centers rather than seeking long-term training opportunities, therefore costs remain lower. Youth participants require long-term classroom training to be adequately prepared for the demands of the changing labor market. Dislocated workers often see lay-off as an opportunity to acquire new skills and make a career change. Both dynamics involve longer, more intense training services, increasing the cost of serving these two groups. The average cost for all three funding streams for PY 2007 was \$2,939 per participant.

PY 2007 proved to be a challenging year for the LWIAs as the rescission of \$10.9M in funding from Arizona meant that each LWIA had to serve an increasing client population with less funding. This resulted in lower expenditures per participant from PY 2006 and meant that fewer participants received the level of service that would allow them to achieve their employment goals. While the perception of "surplus" funds based upon federal expenditure reports proved to be an economic boon for the federal government in reducing the national deficit, it created a deficit in the lives of WIA participants seeking to improve their work skills and find employment which would promote their self-sufficiency.

Evaluation of Workforce Investment Activities

Arizona continues to work toward achievement of the demand-driven workforce development delivery system, which is the common goal of the WIA.

The AWC, through its network of One-Stop centers, greatly expedites statewide delivery of comprehensive, yet seamless, workforce development services to the business community and individuals who are eligible for and in need of these services.

The ADES evaluates each LWIA's outcomes by utilizing the 15 core indicators of performance for adults, dislocated workers, and youth programs. Arizona uses several methods to evaluate workforce investment activities.

- **Annual monitoring** of WIA Title I-B is conducted by the ADES, the state's WIA oversight agency. Monitoring includes a comprehensive review of local programmatic, fiscal and management information systems, provider agreements, and the eligible training provider application process. Activities in the adult, dislocated worker and youth programs are observed and evaluated. Results are tracked, reviewed, and reported.
- **Data Element Validation** is used to measure the accuracy of data used in WIA performance reports. The process compares source documentation in participant files, such as eligibility documentation, to selected information pulled from a sample of exited participant records in the VOS system.
- **Customer Satisfaction surveys** continues to evaluate both participants' and employers' levels of satisfaction by conducting telephone surveys.

In conjunction with monitoring and evaluation of LWIA performance, Arizona provides technical assistance needed to improve performance in a given measure. Technical assistance includes training sessions, assistance in the development of performance improvement plans, and peer-to-peer technical assistance.

Arizona utilizes several different reports to monitor the LWIAs performance outcomes on a regular basis. The reports are reviewed by the field operation liaisons in order to identify areas which may require additional technical assistance and/or training to rectify any deficiencies.

The State of Arizona is committed to continuous improvement in the efficiency and effectiveness of the statewide workforce investment system. Arizona continues to take the steps necessary to ensure collaboration and continuous improvement by strengthening delivery systems, integrating the workforce development system, and establishing system wide performance measures.

Designated Local Areas

Consortium representing Arizona’s Tribal Nations is also a designated LWIA.

Local Workforce Investment Areas

The 14 designated LWIAs provide services both directly and indirectly. LWIAs offer an array of services, as specified in their local plans. LWIAs are held accountable to the LWIBs, which are responsible for strategic planning, program oversight and coordination of resources.

Equal Opportunity Employer/Program
Auxiliary aids and services are available upon request to individuals with disabilities.

Equal Opportunity Employer/Program · Under Titles VI and VII of the Civil Rights Act of 1964 (Title VI & VII), and the Americans with Disabilities Act of 1990 (ADA), Section 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act of 1975, the Department prohibits discrimination in admissions, programs, services, activities, or employment based on race, color, religion, sex, national origin, age, and disability. The Department must make a reasonable accommodation to allow a person with a disability to take part in a program, service or activity. For example, this means if necessary, the Department must provide “auxiliary aids and services upon request to individuals with disabilities”, such as sign language interpreters for people who are deaf, a wheelchair accessible location, or enlarged print materials. It also means that the Department will take any other reasonable action that allows you to take part in and understand a program or activity, including making reasonable changes to an activity. If you believe that you will not be able to understand or take part in a program or activity because of your disability, please let us know of your disability needs in advance if at all possible. To request this document in alternative format or for further information about this policy, contact (602)542-3957; TTY/TDD Services 7-1-1.
